1990 EDITORIAL INDEX

Technical articles by author and subject

AUTHOR

Adams, Paul Jr.
Single compressors with attached air cooled condensers; November p.22

Akridge, James M.
An investigation of off-peak domestic hot water heating; with Dennis Keebaugh; January p.32

Ames, Douglas A.
Thermal storage forum—Eutectic cool storage: Current developments; other forum contributors were Ronald P. Wendland, Maurice W. Wildin, E. Ian Mackie, William E. Harrison, David E. Knebel and Calvin D. MacCracken; April p.46

Anderson, Swiki A.
On-site chiller testing; with Joseph C. Dieckert; April p.54

Ares, Roland
Multiplex-parallel compressor systems for supermarket refrigeration; November p.18

Atwood, Theodore
Pipe sizing and pressure drop calculations for HFC-134a; April p.62

Avery, Gil
The pros and cons of balancing a variable flow water system—Balancing a variable flow water system will ruin the control system; October p.30

Becker, B.R.
A domestic hot water use database; with K.E. Stogsdill; September p.21

Behls, Herman F.
Using the T-Method for duct system design; with Robert J. Tsal; March p.30

Boulin, Jean J.
Standard 90.1's ENVSTD: Using it for compliance; with Drury B. Crawley; May p.30
Standard 90.1's ENVSTD: A tool to evaluate building envelope design; with Drury B. Crawley and J. Steven Schliesing; July p.28

Briggs, Robert S.
A new approach to buildings and energy analysis; with J.R. Brodrick and Drury B. Crawley; August p.15

Brodrick, James R.
Defining the market for gas cooling; with R. Patel; January p.24
A new approach to buildings and energy analysis; with Drury B. Crawley and Robert S. Briggs; August p.15

Brothers, Peter
The impact of AI technology within the HVAC industry; with Charles Culp, Jeff Haberl, Les Norford and John Hall; December p.12

Brown, F.L.
The pros and cons of balancing a variable flow water system—Variable speed pumping versus balancing; October p.31

Brown, Thomas C.
Fire alarm and smoke systems integration; August p.34

CONDENSATION?
DAMPNESS?
DISCOMFORT?
THE **SOLUTION...**

...AN Ebac Dehumidifier!
SELECT FROM OUR FULL RANGE OF MODELS
LOW TEMPERATURE–
HIGH CAPACITY
BUILT TO MEET THE DEMANDING NEEDS
OF INDUSTRY, MUNICIPALITIES
AND COMMERCIAL APPLICATIONS

NCAC
OVER 25 YEARS OF SERVICE

National Council of Acoustical Consultants...A Sound Commitment To The Highest Standards

When you rely on qualified consultants for their expertise in acoustical services, it's important to feel secure with the firm you choose. NCAC is an organization of acoustical consulting firms committed to the advancement of quality and services of the profession.

NCAC member firms and individuals are professionals in the field of acoustics, providing specialized consulting, engineering and design services, in

- ▲ Architectural Acoustics
- ▲ Environmental Acoustics
- ▲ Industrial Noise and Vibration Control
- ▲ Sound Reinforcement Systems

Since each NCAC member is dedicated to the highest standard of professional ethics and business practices, you can feel confident that your projects will be handled with knowledge and integrity.

For a directory of NCAC members, call us at **(201) 379-1100** or send us a letter to: National Council of Acoustical Consultants

Bryan, Harvey J.
An overview of Standard 90.1: Daylighting; Energy cost budget method; other sections by Thomas P. Wutka, Hayden N. McKay, Joseph J. Deringer and Steven T. Taylor; February p.26, p.35

Campbell, Bruce G.
Performance testing of ductwork for fire protection—Protection of duct openings in two-hour fire resistant walls and partitions; other forum contributors were Richard G. Gewain, James H. Shanley Jr., Joseph L. Scheffey, William A. Schmidt and Winfield T. Irwin; May p.16

Coad, William
The pros and cons of balancing a variable flow water system—Variable flow chilled water systems; October p.31

Cole, Ronald A.
Ammonia as a refrigerant in light of the CFC phaseout; December p.27

Coward, Charles W. Jr.
System effect—A design fundamental; May p.44

Craig, A.B.
Radon mitigation in schools; with Kelly W. Leovic and David W. Saum; January p.40; February p.20

Crawley, Drury B.
Standard 90.1's ENVSTD: Using it for compliance; with Jean J. Boulin; May p.30
Standard 90.1's ENVSTD: A tool to evaluate building envelope design; with J. Steven Schliesing and Jean J. Boulin; July p.28
A new approach to buildings and energy analysis; with James R. Brodrick and Robert S. Briggs; August p.15

Culp, Charles
The impact of AI technology within the HVAC industry; with Jeff Haberl, Les Norford, Peter Brothers and John Hall; December p.12

Damiano, Leonard
Measurement for the control of fresh air intake; with David P.W. Solberg and David D. Dougan; January p.46

Deringer, Joseph J.
An overview of Standard 90.1: Building envelope; other sections by Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay and Steven T. Taylor; February p.30

Dieckert, Joseph C.
On-site chiller testing: with Swiki A. Anderson; April p.54

Dougan, David D.
Measurement for the control of fresh air intake; with David P.W. Solberg and Leonard Damiano; January p.46

Echols, Joesph T.
Cooling tower management using ozone instead of multichemicals; with Sherman T. Mayne; June p.34

Flanagan, Robert W.
Air handling equipment design and its impact on performance; March p.53

Gardner, Thomas F.
Is the ventilation engineer responsible for sick building syndrome damages?; August p.22

Gilbert, Joel S.
Cogeneration—competition or resource; February p.12

Gewain, Richard G.
Performance testing of ductwork for fire protection—Protection of duct openings in two-hour fire resistant walls and partitions; other forum contributors were Bruce G. Campbell, James H. Shanley Jr., Joseph L. Scheffey, William A. Schmidt and Winfield T. Irwin; May p.16

Gowan, A. Damon
Professional development through participation (Presidental address); August p.12

Haberl, Jeff S.
Improving energy audits: How annual and monthly consumption data can help; with Paul S. Komor; August p.26
Improving energy audits: How daily and hourly consumption data can help; with Paul S. Komor; September p.26
The impact of AI technology within the HVAC industry; with Charles Culp, Peter Brothers, Les Norford and John Hall; December p.12

Hall, John
The impact of AI technology within the HVAC industry; with Charles Culp, Jeff Haberl, Peter Brothers and Les Norford; December p.12

Harrison, William E.
Thermal storage forum—Stratified thermal storage: A new/old technology; with Maurice W. Wildin and E. Ian Mackie; other forum contributors were Ronald P. Wendland, David E. Knebel, Calvin D. MacCracken and Douglas A. Ames; April p.29

Hegberg, Richard A.
The pros and cons of balancing a variable flow water system—Hydronic system design for variable speed/volume pumping operations; October p.31

Henck, Charles E.
Building renovation with continued occupancy; July p.18

Ho, Wai-fuk
A self-tuning software package for direct digital controllers; with Wai-hung Ng; June p.40

Howell, Ronald H.
Field measurement of air velocity: Pitot traverse or vane anemometer?; with Harry J. Sauer Jr.; March p.46

Irwin, Winfield T.
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; other forum contributors were Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr., Joseph L. Scheffey and William A. Schmidt; May p.26

Keebaugh, Dennis
An investigation of off-peak domestic hot water heating; with James M. Akridge; January p.32

Kelsey, Dennis
Moving into digital control through retrofitting; with Dennis R. Webb; July p.12

Kinkead, Devon A.
Pleated DPCC-based adsorbers: New technology for air purification; November p.35

Klote, John H.
The Plaza Hotel fire experiments; October p.25

Knebel, David E.
Thermal storage forum—Off-peak cooling with thermal storage; other forum contributors were Ronald P. Wendland, Maurice W. Wildin, E. Ian Mackie, William E. Harrison, Calvin D. MacCracken and Douglas A. Ames; April p.40

Komor, Paul S.
Improving energy audits: How annual and monthly consumption data can help; with Jeff S. Haberl; August p.26
Improving energy audits: How daily and hourly consumption data can help; with Jeff S. Haberl; September p.26

REDUCE DOWNTIME. INCREASE EFFICIENCY.

CENTRI-KLEEN
Centrifugal Separators

- Protects cooling system towers from harmful and energy consuming slag, scale and grit.
- Reduces costly sediment build-up for improved heat transfer.
- Minimizes chiller downtime for reduced maintenance costs.
- No moving or electrical parts. Centrifugal action filter removes solids as fine as 80 microns.
- 3 GPM to 12,000 GPM capacity models for new construction and retrofit applications.

Start saving money and energy. Specify and install Centri-Kleen Centrifugal Separators.

1990 Editorial Index

Leovic, Kelly W.
Radon mitigation in schools; with A.B. Craig and David W. Saum; January p.40; February p.20

MacCracken, Calvin D.
Thermal storage forum—OPAC—All new for the 1990s; other forum contributors were Ronald P. Wendland, Maurice W. Wildin, E. Ian Mackie, William E. Harrison, David E. Knebel and Douglas A. Ames; April p.41

McBurney, Kevin
Maintenance suggestions for cooling towers and accessories; June p.16

McKay, Hayden N.
An overview of Standard 90.1: Lighting; other sections by Thomas P. Wutka, Harvey J. Bryan, Joseph J. Deringer, and Steven T. Taylor; February p.28

Mackie, E. Ian
Thermal storage forum—Stratified thermal storage: A newfold technology; with Maurice W. Wilden and William E. Harrison; other forum contributors were David E. Knebel, Calvin D. MacCracken, Ronald P. Wendland and Douglas A. Ames; April p.29

Mayne, Sherman T.
Cooling tower management using ozone instead of multichemicals; with Joseph T. Echols; June p.34

Meitz, Amanda K.
Cooling tower water treatment in the 1990s; June p.28

Meckler, Gershon
Gas/electric cold-air systems; June p.52

Metzger, James E.
Radon testing in Arkansas homes; September p.38

Michel, Larry
Retrofitting and modernization of the Avery Institute; July p.24

Miner, Sydney M.
Ammonia as refrigerant of choice; December p.43

Nagengast, Bernard A.
Alfred Wolff-HVAC pioneer; January p.S66

Ng, Wai-hung
A self-tuning software package for direct digital controllers; with Wai-fuk Ho; June p.40

Norford, Les
The impact of AI technology within the HVAC industry; with Charles Culp, Jeff Haberl, Peter Brothers and John Hall; December p.12

Ohling, Robert S.
Rapid air precooling of fruits and vegetables; March p.60
Ammonia: The newfold refrigerant; December p.34

Patel, R.
Defining the market for gas cooling; with J.R. Brodrick; January p.24

Petitjean, Robert
The pros and cons of balancing a variable flow water system—Balancing a variable flow water system improves the control system; October p.31

Sauer, Harry J., Jr.
Field measurement of air velocity: Pitot traverse or vane anemometer?; with Ronald H. Howell; March p.46

Saum, David W.
Radon mitigation in schools; with Kelly W. Leovic and A.B. Craig; January p.40; February p.20

Scheffey, Joseph L.
Performance testing of ductwork for fire protection—Protection of duct openings in two-hour fire resistant walls and partitions; other forum contributors were Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr., William A. Schmidt and Winfield T. Irwin; May p.16

Schliesing, J. Steven
Standard 90.1's ENVSTD: A tool to evaluate building envelope design; with Drury B. Crawley and Jean J. Boulin; July p.28

Schmidt, William A.
Performance testing of ductwork for fire protection—Introduction; other forum contributors were Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr., Joseph L. Scheffey and Winfield T. Irwin; May p.14

Shanley, James H., Jr.
Performance testing of ductwork for fire protection—Protection of duct openings in two-hour fire resistant walls and partitions; other contributors were Richard G. Gewain, Bruce G. Campbell, Joseph L. Scheffey, William A. Schmidt and Winfield T. Irwin; May p.16

Solberg, David P.W.
Measurement for the control of fresh air intake; with David D. Dougan and Leonard Damiano; January p.46

Statt, Terry G.
Potential ozone-safe refrigerants for centrifugal chillers; September p.46

Stenger, Harvey G.
Low-rise residential hydronic heating systems; September p.17

Stethem, W.C.
The pros and cons of balancing a variable flow water system—A variable flow water system can be part-load manageable, efficient and not require field balance; October p.31

Stogsdill, K.E.
A domestic hot water use database; with B.R. Becker; September p.21

Swift, Greg W.
Malone refrigeration; November p.28

Taylor, Steven T.
An overview of Standard 90.1: HVAC systems and equipment; other sections by Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay and Joseph J. Deringer; February p.34

Tsal, Robert J.
Using the T-Method for duct system design; with Herman F. Behls; March p.30

Webb, Dennis R.
Moving into digital control through retrofitting; with Dennis Kelsey; July p.12

Wendland, Ronald P.
Thermal storage forum—Cool storage status update; other forum contributors were Maurice W. Wildin, E. Ian Mackie, William E. Harrison, David E. Knebel, Calvin D. MacCracken and Douglas A. Ames; April p.26

Wildin, Maurice W.
Thermal storage forum—Stratified thermal storage: A newfold technology; with E. Ian Mackie and William E. Harrison; other forum contributors were David E. Knebel, Calvin D. MacCracken, Ronald P. Wendland and Douglas A. Ames; April p.29

Wutka, Thomas P.
An overview of Standard 90.1: Introduction; other sections by Harvey J. Bryan, Hayden N. McKay, Joseph J. Deringer and Steven T. Taylor; February p.26

Zinn, Michael F.
Cogeneration: Utility company versus independent developer; February p.17

SUBJECT

Adsorption
Pleated DPCC-based adsorbers: New technology for air purification; Devon A. Kinkead; November p.35

Air cooling
Maintenance suggestions for cooling towers; Kevin McBurney; June p.16
Cooling tower water treatment in the 1990s; Amanda K. Meitz; June p.28
Cooling tower management using ozone instead of multichemicals; Joseph T. Echols and Sherman T. Mayne; June p.34

Air distribution
Measurement for the control of fresh air intake; David P.W. Solberg, David D. Dougan and Leonard Damiano; January p.46

Air-conditioning
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24
Radon mitigation in schools; Kelly W. Leovic, A.B. Craig and David W. Saum; January p.40
An overview of Standard 90.1; Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay, Joseph J. Deringer and Steven T. Taylor; February p.26

Air-flow
Field measurement of air velocity: Pitot traverse or vane anemometer?; Ronald H. Howell and Harry J. Sauer Jr.; March p.46
Rapid air precooling of fruits and vegetables; Robert S. Ohling; March p.60
System effect—A design fundamental; Charles W. Coward Jr.; May p.44

Air-handling
Using the T-Method for duct system design; Robert J. Tsal and Herman F. Behls; March p.30
Air handling equipment design and its impact on performance; Robert W. Flanagan; March p.53

Air-quality
Radon mitigation in schools; Kelly W. Leovic, A.B. Craig and David W. Saum; January p.40
Radon mitigation in schools; David W. Saum, A.B. Craig and Kelly W. Leovic; February p.20
Measurement for the control of fresh air intake; David P.W. Solberg, David D. Dougan and Leonard Damiano; January p.46
Pleated DPCC-based adsorbers: New technology for air purification; Devon A. Kinkead; November p.35

Ammonia
Ammonia as a refrigerant in light of the CFC phase-out; Ronald A. Cole; December p.27
Ammonia: The newfold refrigerant; Robert S. Ohling; December p.34
Ammonia as a refrigerant of choice; Sydney M. Miner; December p.43

Azeotrope
Potential ozone-safe refrigerants for centrifugal chillers; Terry G. Statt; September p.46

Balancing
The pros and cons of balancing a variable flow water system—Balancing a variable flow water system will ruin the control system, Gil Avery, October p.30; A variable flow water system can be part-load manageable, efficient and not require field balance, W.C. Stethem, October p.31; Variable flow chilled water systems, William J. Coad, October p.31; Hydronic system design for variable speed/volume pumping operation, Richard A.

1990 Editorial Index

Hegberg, October p.31; Variable speed pumping versus balancing, F.L. Brown, October p.31; Balancing a variable flow water system improves the control system, Robert Petitjean; October p.31

Boiler
Low-rise residential hydronic heating systems; Harvey G. Stenger; September p.17

Building code
Performance testing of ductwork for fire protection—Introduction; William A. Schmidt; May p.14
Performance testing of ductwork for fire protection—Protection of openings in two-hour fire resistant walls and partitions; Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr. and Joseph L. Scheffey; May p.16
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; Winfield T. Irwin; May p.26

Building systems
An overview of Standard 90.1; Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay, Joseph J. Deringer and Steven T. Taylor; February p.26

Chiller
Thermal storage forum—Stratified thermal storage: A newfold technology; Maurice W. Wildin, E. Ian Mackie and William E. Harrison; April p.29
Thermal storage forum—Eutectic cool storage: Current developments; Douglas A. Ames, April p.46
On-site chiller testing; Swiki A. Anderson and Joseph C. Dieckert; April p.54
Potential ozone-safe refrigerants for centrifugal chillers; Terry G. Statt; September p.46

Chlorofluorocarbons
Pipe sizing and pressure drop calculations for HFC-134a; Theodore Atwood; April p.62

Chlorofluorohydrocarbons
Pipe sizing and pressure drop calculations for HFC-134a; Theodore Atwood; April p.62

Cogeneration
Cogeneration—competition or resource; Joel S. Gilbert; February p.12
Utility company versus independent developer; Michael F. Zinn; February p.17

Coil
Field measurement of air velocity: Pitot traverse or vane anemometer?; Ronald H. Howell and Harry J. Sauer Jr.; March p.46
Air handling equipment design and its impact on performance; Robert W. Flanagan; March p.53
The pros and cons of balancing a variable flow water system—Balancing a variable flow water system will ruin the control system, Gil Avery, October p.30; A variable flow water system can be part-load manageable, efficient and not require field balance, W.C. Stethem, October p.31; Variable flow chilled water systems, William J. Coad, October p.31; Hydronic system design for variable speed/volume pumping operation, Richard A. Hegberg, October p.31; Variable speed pumping versus balancing, F.L. Brown, October p.31; Balancing a variable flow water system improves the control system, Robert Petitjean; October p.31

Cold-storage
Rapid air precooling of fruits and vegetables; Robert S. Ohling; March p.60

Combustion
Performance testing of ductwork for fire protection—Introduction; William A. Schmidt; May p.14
Performance testing of ductwork for fire protection—Protection of openings in two-hour fire resistant walls and partitions; Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr. and Joseph L. Scheffey; May p.16
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; Winfield T. Irwin; May p.26

Comfort
Is the ventilation engineer responsible for sick building syndrome damages?; Thomas F. Gardner; August p.22

Commercial
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24

Compressor
Multiplex-parallel compressor systems for supermarket refrigeration; Roland Ares; November p.18
Single compressors with attached air cooled condensers; Paul Adams Jr.; November p.22

Computer
On-site chiller testing; Swiki A. Anderson and Joseph C. Dieckert; April p.54
Standard 90.1's ENVSTD: Using it for compliance; Drury B. Crawley and Jean Boulin; May p.30
A self-tuning software package for direct digital controllers; Wai-fuk Ho and Wai-hung Ng; June p.40
The impact of AI technology within the HVAC industry; Charles Culp, Jeff Haberl, Les Norford, Peter Brothers and John Hall; December p.12

"Y" STRAINERS CHECK VALVES

Normally we don't like to talk in abbreviations but it's the fastest way of saying choose MUELLER STEAM SPECIALTY "Y" STRAINERS and CHECK VALVES for the best Price, Delivery, and Quality!

Price **D**elivery **Q**uality

Our spring loaded silent check valves can protect your piping and associated equipment from water hammer damage. ANSI service for 125 lb to 1500 lb available. Sizes from 1" to 72".

Our "Y" strainers can remove scale and other particles from pipelines which can damage costly pumps, meters, and valves. ANSI service for 125 lb to 2500 lb available. Sizes from ¼" to 48".

"Y" strainers and silent check valves are available to fit flanged, screwed, and grooved end connections. Other end configurations, including Mil-V connections, are available.

See us at the ASHRAE Show!

(Circle No. 67 on Reader Service Card)

Consumption
A new approach to buildings and energy analysis; James R. Brodrick, Drury B. Crawley and Robert S. Briggs; August p.15
Improving energy audits: How annual and monthly consumption data can help; Jeff S. Haberl and Paul S. Komor; August p.26
Improving energy audits; How daily and hourly consumption data can help; Jeff S. Haberl and Paul S. Komor; September p.26

Contamination
Radon mitigation in schools; Kelly W. Leovic, A.B. Craig and David W. Saum; January p.40
Radon mitigation in schools; David W. Saum, A.B. Craig and Kelly W. Leovic; February p.20
Is the ventilation engineer responsible for sick building syndrome injures?; Thomas F. Gardner; August p.22

Control
A self-tuning software package for direct digital controllers; Wai-fuk Ho and Wai-hung Ng; June p.40
Moving into digital control through retrofitting; Dennis Kelsey and Dennis R. Webb; July p.12
Fire alarm and smoke control systems integration; Thomas C. Brown; August p.34
The Plaza Hotel fire experiments; John H. Klote; October p.25
The pros and cons of balancing a variable flow water system—Balancing a variable flow water system will ruin the control system, Gil Avery, October p.30; A variable flow water system can be part-load manageable, efficient and not require field balance, W.C. Stethem, October p.31; Variable flow chilled water systems, William J. Coad, October p.31; Hydronic system design for variable speed/volume pumping operation, Richard A. Hegberg, October p.31; Variable speed pumping versus balancing, F.L. Brown, October p.31; Balancing a variable flow water system improves the control system, Robert Petitjean, October p.31

Cooling
Standard 90.1's ENVSTD: A tool to evaluate building envelope design; Drury B. Crawley, J. Steven Schliesing and Jean J. Boulin; July p.28

Cooling towers
Maintenance suggestions for cooling towers and accessories; Kevin McBurney; June p.16
Cooling tower water treatment in the 1990s; Amanda K. Meitz; June p.28
Cooling tower management using ozone instead of multichemicals; Joseph T. Echols and Sherman T. Mayne; June p.34

Dampers
Performance testing of ductwork for fire protection—Introduction; William A. Schmidt; May p.14
Performance testing of ductwork for fire protection—Protection of openings in two-hour fire resistant walls and partitions; Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr. and Joseph L. Scheffey; May p.16
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; Winfield T. Irwin; May p.26

Dessicant
Gas/electric cold-air systems; Gershon Meckler; June p.52
Pleated DPCC-based adsorbers: New technology for air purification; Devon A. Kinkead; November p.35

Duct
Using the T-Method for duct system design; Robert J. Tsal and Herman F. Behls; March p.30
Performance testing of ductwork for fire protection—Introduction; William A. Schmidt; May p.14
Performance testing of ductwork for fire protection—Protection of openings in two-hour fire resistant walls and partitions; Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr. and Joseph L. Scheffey; May p.16
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; Winfield T. Irwin; May p.26
System effect—A design fundamental; Charles W. Coward Jr.; May p.44

Electric
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24
An investigation of off-peak domestic hot water heating; James M. Akridge and Dennis Keebaugh; January p.32
Cogeneration—competition or resource; Joel S. Gilbert; February p.12
Utility company versus independent developer; Michael F. Zinn; February p.17
Gas/electric cold-air systems; Gershon Meckler; June p.52
Improving energy audits: How annual and monthly consumption data can help; Jeff S. Haberl and Paul S. Komor; August p.26
Improving energy audits; How daily and hourly consumption data can help; Jeff S. Haberl and Paul S. Komor; September p.26

Energy
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24
Gas/electric cold-air systems; Gershon Meckler; June p.52
A new approach to buildings and energy analysis; James R. Brodrick, Drury B. Crawley and Robert S. Briggs; August p.15
Improving energy audits: How annual and monthly consumption data can help; Jeff S. Haberl and Paul S. Komor; August p.26
Improving energy audits; How daily and hourly consumption data can help; Jeff S. Haberl and Paul S. Komor; September p.26

Energy—Awards
1990 ASHRAE Energy Awards; March p.16

Energy Calculation
An overview of Standard 90.1; Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay, Joseph J. Deringer and Steven T. Taylor; February p.26
A new approach to buildings and energy analysis; James R. Brodrick, Drury B. Crawley and Robert S. Briggs; August p.15
Improving energy audits: How annual and monthly consumption data can help; Jeff S. Haberl and Paul S. Komor; August p.26
Improving energy audits; How daily and hourly consumption data can help; Jeff S. Haberl and Paul S. Komor; September p.26

Energy Conservation
An overview of Standard 90.1; Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay, Joseph J. Deringer and Steven T. Taylor; February p.26
A new approach to buildings and energy analysis; James R. Brodrick, Drury B. Crawley and Robert S. Briggs; August p.15

Environment
Retrofitting and modernization of the Avery Institute; Larry Michel; July p.24

Evaporation
Cooling tower water treatment in the 1990s; Amanda K. Meitz; June p.28
Cooling tower management using ozone instead of multichemicals; Joseph T. Echols and Sherman T. Mayne; June p.34

Fan
Radon mitigation in schools; Kelly W. Leovic, A.B. Craig and David W. Saum; January p.40; February p.20
Measurement for the control of fresh air intake; David P.W. Solberg, David D. Dougan and Leonard Damiano; January p.46
Using the T-Method for duct system design; Robert J. Tsal and Herman F. Behls; March p.30
Air handling equipment design and its impact on performance; Robert W. Flanagan; March p.53
Rapid air precooling of fruits and vegetables; Robert S. Ohling; March p.60
System effect—A design fundamental; Charles W. Coward Jr.; May p.44
The Plaza Hotel fire experiments; John H. Klote; October p.25

Filtration
Maintenance suggestions for cooling towers; Kevin McBurney; June p.16
Pleated DPCC-based adsorbers: New technology for air purification; Devon A. Kinkead; November p.35

Fire safety
Performance testing of ductwork for fire protection—Introduction; William A. Schmidt; May p.14
Performance testing of ductwork for fire protection—Protection of openings in two-hour fire resistant walls and partitions; Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr. and Joseph L. Scheffey; May p.16
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; Winfield T. Irwin; May p.26
The Plaza Hotel fire experiments; John H. Klote; October p.25

Food
Rapid air precooling of fruits and vegetables; Robert S. Ohling; March p.60

Freeze protection
Maintenance suggestions for cooling towers; Kevin McBurney; June p.16

Gas
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24
Gas/electric cold-air systems; Gershon Meckler; June p.52

Gas-fired
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24

Health
Is the ventilation engineer responsible for sick building syndrome damages?; Thomas F. Gardiner; August p.22

Heat-transfer
Rapid air precooling of fruits and vegetables; Robert S. Ohling; March 60

Heating
An overview of Standard 90.1; Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay, Joseph J. Deringer and Steven T. Taylor; February p.26
Standard 90.1's ENVSTD: A tool to evaluate building envelope design; Drury B. Crawley, J. Steven Schliesing and Jean J. Boulin; July p.28
Low-rise residential hydronic heating systems; Harvey G. Stenger; September p.17

History
Alfred Wolff—HVAC pioneer; Bernard Nagengast; January p.S66
Retrofitting and modernization of the Avery Institute; Larry Michel; July p.24

Hotel-motel
An investigation of off-peak domestic hot water heating; James M. Akridge and Dennis Keebaugh; January p.32

1990 Editorial Index

Humidity
Retrofitting and modernization of the Avery Institute; Larry Michel; July p.24

Hydronic
Low-rise residential hydronic heating systems; Harvey G. Stenger; September p.17
A domestic hot water use database; B.R. Becker and K.E. Stogsdill; Septembe p.21
The pros and cons of balancing a variable flow water system—Balancing a variable flow water system will ruin the control system, Gil Avery, October p.30; A variable flow water system can be part-load manageable, efficient and not require field balance, W.C. Stethem, October p.31; Variable flow chilled water systems, William J. Coad, October p.31; Hydronic system design for variable speed/volume pumping operation, Richard A. Hegberg, October p.31; Variable speed pumping versus balancing, F.L. Brown, October p.31; Balancing a variable flow water system improves the control system, Robert Petitjean, October p.31

Ice
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24

Lighting
An overview of Standard 90.1; Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay, Joseph J. Deringer and Steven T. Taylor; February p.26
Retrofitting and modernization of the Avery Institute; Larry Michel; July p.24

Load-calculation
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24
Thermal storage forum—Stratified thermal storage: A new/old technology; Maurice W. Wildin, E. Ian Mackie and William E. Harrison; April p.29

Measurement
Measurement for the control of fresh air intake; David P.W. Solberg, David D. Dougan and Leonard Damiano; January p.46
Field measurement of air velocity: Pitot traverse or vane anemometer?; Ronald H. Howell and Harry J. Sauer Jr.; March p.46

Monitoring
Maintenance suggestions for cooling towers; Kevin McBurney; June p.16
A self-tuning software package for direct digital controllers; Wai-fuk Ho and Wai-hung Ng; June p.40
Moving into digital control through retrofitting; Dennis Kelsey and Dennis R. Webb; July p.12

Noise
Air handling equipment design and its impact on performance; Robert W. Flanagan; March p.53

Office building
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24
Building renovation with continued occupancy; Charles E. Henck; July p.18
A new approach to buildings and energy analysis; James R. Brodrick, Drury B. Crawley and Robert S. Briggs; August p.15

Piping
Pipe sizing and pressure drop calculations for HFC-134a; Theodore Atwood; April p.62

Pressure
Measurement for the control of fresh air intake; David P.W. Solberg, David D. Dougan and Leonard Damiano; January p.46
Using the T-Method for duct system design; Robert J. Tsal and Herman F. Behls; March p.30
Air handling equipment design and its impact on performance; Robert W. Flanagan; March p.53
Rapid air precooling of fruits and vegetables; Robert S. Ohling; March p.60
Pipe sizing and pressure drop calculations for HFC-134a; Theodore Atwood; April p.62
System effect—A design fundamental; Charles W. Coward Jr.; May p.44
The Plaza Hotel fire experiments; John H. Klote; October p.25

Pressure loss
Radon mitigation in schools; Kelly W. Leovic, A.B. Craig and David W. Saum; January p.40
Radon mitigation in schools; David W. Saum, A.B. Craig and Kelly W. Leovic; February p.20
Using the T-Method for duct system design; Robert J. Tsal and Herman F. Behls; March p.30
Air handling equipment design and its impact on performance; Robert W. Flanagan; March p.53
Rapid air precooling of fruits and vegetables; Robert S. Ohling; March p.60

Pump
Thermal storage forum—Eutectic cool storage: Current developments; Douglas A. Ames; April p.46
The pros and cons of balancing a variable flow water system—Balancing a variable flow water system will ruin the control system, Gil Avery, October p.30; A variable flow water system can be part-load manageable, efficient and not require field

(Circle No. 68 on Reader Service Card)

balance, W.C. Stethem, October p.31; Variable flow chilled water systems, William J. Coad, October p.31; Hydronic system design for variable speed/volume pumping operation, Richard A. Hegberg, October p.31; Variable speed pumping versus balancing, F.L. Brown, October p.31; Balancing a variable flow water system improves the control system, Robert Petitjean, October p.31

Radon
Radon mitigation in schools; Kelly W. Leovic, A.B. Craig and David W. Saum; January p.40
Radon mitigation in schools; David W. Saum, A.B. Craig and Kelly W. Leovic; February p.20
Radon testing in Arkansas homes; James E. Metzger; September p.38

Rating
Performance testing of ductwork for fire protection—Introduction; William A. Schmidt; May p.14
Performance testing of ductwork for fire protection—Protection of openings in two-hour fire resistant walls and partitions; Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr. and Joseph L. Scheffey; May p.16
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; Winfield T. Irwin; May p.26

Refrigerant
Rapid air precooling of fruits and vegetables; Robert S. Ohling; March p.60
Pipe sizing and pressure drop calculations for HFC-134a; Theodore Atwood; April p.62
Potential ozone-safe refrigerants for centrifugal chillers; Terry G. Statt; September p.46
Ammonia as a refrigerant in light of the CFC phaseout; Ronald A. Cole; December p.27
Ammonia as refrigerant of choice; Sydney M. Miner; December p.43
Ammonia: The new/old refrigerant; Ronald S. Ohling; December p.34

Refrigeration
Multiplex-parallel compressor systems for supermarket refrigeration; Roland Ares; November p.18
Single compressors with attached air cooled condensers; Paul Adams Jr.; November p.22
Malone refrigeration; Greg W. Swift; November p.28

Research
The Plaza Hotel fire experiments; John H. Klote; October p.25

Research reports
A domestic hot water use database; B.R. Becker and K.E. Stogsdill; September p.21
Improving energy audits: How annual and monthly consumption data can help; Jeff S. Haberl and Paul S. Komor; August p.26
Improving energy audits: How daily and hourly consumption data can help; Jeff S. Heberl and Paul S. Komor; September p.26
The Plaza Hotel fire experiments; John H. Klote; October p.25

Safety
Fire alarm and smoke control systems integration; Thomas C. Brown; August p.34

School
Radon mitigation in schools; Kelly W. Leovic, A.B. Craig and David W. Saum; January p.40
Radon mitigation in schools; David W. Saum, A.B. Craig and Kelly W. Leovic; February p.20

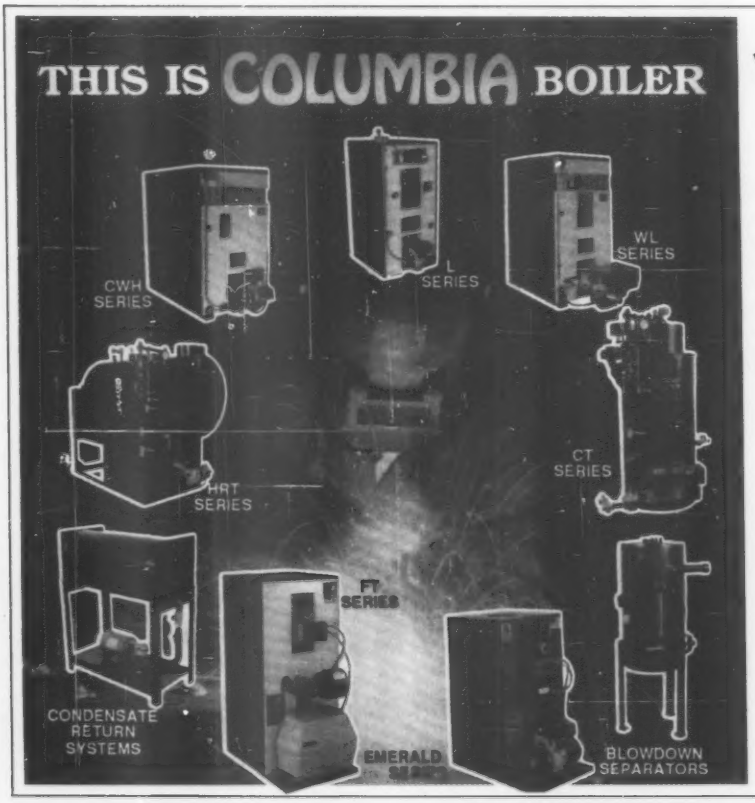
Shading
Standard 90.1's ENVSTD: A tool to evaluate building envelope design; Drury B. Crawley, J. Steven Schliesing and Jean J. Boulin; July p.28

Shopping center
Improving energy audits: How annual and monthly consumption data can help; Jeff S. Haberl and Paul S. Komor; August p.26
Improving energy audits; How daily and hourly consumption data can help; September p.26

Sizing
Pipe sizing and pressure drop calculations for HFC-134a; Theodore Atwood; April p.62

Smoke control
Performance testing of ductwork for fire protection—Introduction; William A. Schmidt; May p.14
Performance testing of ductwork for fire protection—Protection of openings in two-hour fire resistant walls and partitions; Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr. and Joseph L. Scheffey; May p.16
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; Winfield T. Irwin; May p.26
Fire alarm and smoke control systems integration; Thomas C. Brown; August p.34

Standards
An overview of Standard 90.1; Thomas P. Wutka, Harvey J. Bryan, Hayden N. McKay, Joseph J.



Introducing our new 5-yr. Warranty On Commercial/ Industrial Boilers!

For more than half a century, Columbia's built a better boiler—and now we're backing our boilers better, too. Now you can specify and buy America's premier boiler for hydronic or steam heat, high- or low-pressure steam, or instantaneous hot water, and get unsurpassed five-year protection. Ask your Columbia Distributor for complete details.

COLUMBIA®

Columbia Boiler Co.
Box G, Pottstown, PA 19464

1990 Editorial Index

Deringer and Steven T. Taylor; February p.26
Standard 90.1's ENVSTD: Using it for compliance; Drury B. Crawley and Jean J. Boulin; May p.30
Standard 90.1's ENVSTD: A tool to evaluate building envelope design; Drury B. Crawley, J. Steven Schliesing and Jean J. Boulin; July p.26
Is the ventilation engineer responsible for sick building syndrome damages?; Thomas F. Gardner; August p.22

Supermarket
Multiplex-parallel compressor systems for supermarket refrigeration; Roland Ares; November p.18
Single compressors with attached air cooled condensers; Paul Adams Jr.; November p.22

Systems—building
The impact of AI technology within the HVAC industry; Charles Culp, Jeff Haberl, Les Norford, Peter Brothers and John Hall; December p.12

Testing
Field measurement of air velocity: Pitot traverse or vane anemometer?; Ronald H. Howell and Harry J. Sauer Jr.; March p.46
On-site chiller testing; Swiki A. Anderson and Joseph C. Dieckert; April p.54
Performance testing of ductwork for fire protection—Introduction; William A. Schmidt; May p.14
Performance testing of ductwork for fire protection—Protection of openings in two-hour fire resistant walls and partitions; Richard G. Gewain, Bruce G. Campbell, James H. Shanley Jr. and Joseph L. Scheffey; May p.16
Performance testing of ductwork for fire protection—Dampers provide protection of duct openings in two-hour fire resistant walls and partitions; Winfield T. Irwin; May p.26
System effect—A design fundamental; Charles W. Coward Jr.; May p.44
Radon testing in Arkansas homes; James E. Metzger; September p.38

Thermal storage
Defining the market for gas cooling; J.R. Brodrick and R. Patel; January p.24
An investigation of off-peak domestic hot water heating; James M. Akridge and Dennis Keebaugh; January p.32
Thermal storage forum: Ronald P. Wendland, Maurice W. Wildin, E. Ian Mackie, William E. Harrison, David E. Knebel, Calvin D. MacCracken and Douglas A. Ames; April p.26

Treatment
Cooling tower water treatment in the 1990s; Amanda K. Meitz; June p.28
Cooling tower management using ozone instead of multichemicals; Joseph T. Echols and Sherman T. Mayne; June p.34

Utility
Cogeneration—competition or resource; Joel S. Gilbert; February p.12
Utility company versus independent developer; Michael F. Zinn; February p.17

Valves
The pros and cons of balancing a variable flow water system—Balancing a variable flow water system will ruin the control system, Gil Avery, October p.30; A variable flow water system can be part-load manageable, efficient and not require field balance, W.C. Stethem, October p.31; Variable flow chilled water systems, William J. Coad, October p.31; Hydronic system design for variable speed/volume pumping operation, Richard A. Hegberg, October p.31; Variable speed pumping versus balancing, F.L. Brown, October p.31; Balancing a variable flow water system improves the control system, Robert Petitjean, October p.31

Variable volume
Measurement for the control of fresh air intake; David P.W. Solberg, David D. Dougan and Leonard Damiano; January p.46

Ventilation
Radon mitigation in schools; Kelly W. Leovic, A.B. Craig and David W. Saum; January p.40
Radon mitigation in schools; David W. Saum, A.B. Craig and Kelly W. Leovic; February p.20
Measurement for the control of fresh air intake; David P.W. Solberg, David D. Dougan and Leonard Damiano; January p.46
Field measurement of air velocity: Pitot traverse or vane anemometer?; Ronald H. Howell and Harry J. Sauer Jr.; March p.46
Is the ventilation engineer responsible for sick building syndrome damages?; Thomas F. Gardner; August p.22
Fire alarm and smoke control systems integration; Thomas C. Brown; August p.34
Radon testing in Arkansas homes; James E. Metzger; September p.38

Water treatment
Maintenance suggestions for cooling towers; Kevin McBurney; June p.16
Cooling tower water treatment in the 1990s; Amanda K. Meitz; June p.28
Cooling tower management using ozone instead of multichemicals; Joseph T. Echols and Sherman T. Mayne; June p.34

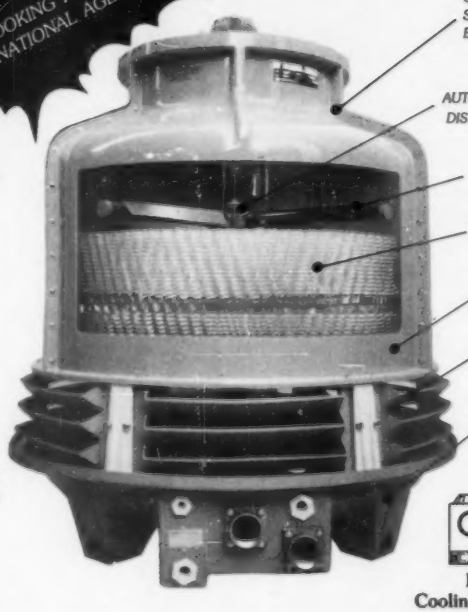
RYOWO™ FRP COOLING TOWER
THE BEST FOR LESS

* ROUND "BOTTLE" TYPE & COUNTER FLOW DESIGN
REDUCE AIR PRESSURE DROP
REQUIRE LOWER FAN POWER
MINIMIZE OPERATION COST

LOOKING FOR INTERNATIONAL AGENTS

* FIBREGLASS REINFORCED PLASTIC TOWER CASING & BASIN
NON-CORROSIVE & LONG LIFE
STRONG & LIGHT WEIGHT
EASY OF INSTALLATION

* FULL RANGE PRODUCTS
FROM 8 T/R TO 1000 T/R SUITABLE FOR CENTRAL AIR CONDITIONING AND INDUSTRIAL COOLING PURPOSES



RYOWO (HOLDING) CO., LTD.
Rm. 1218 Argyle Centre 1, 688 Nathan Road,
Kowloon, Hong Kong.
Tel.: 3918381/5 Fax: (852) 7893802
Telex: 37941 RYOWO HX
